

Laurent le Beau-Martin

laurent@lebeaumartin.com
(514) 692-2900

I am a versatile software developer with strong troubleshooting skills. I pick up new technologies very quickly and love learning how they work, both inside and out. Knowledge is something I strongly value; I make it a point to stay up-to-date on the latest trends and best practices. I am looking for work at an inclusive and quality-oriented company.

Work Experience

Radio-Canada/CBC [www.radio-canada.ca]

March 2015 – Present

Web Developer

- Built CMS's and publishing platforms for journalists
- Developed REST APIs

Technologies: JavaScript, C# (ASP.NET Web API), SQL Server

Seedbox Technologies [www.seedbox.com]

May 2014 – February 2015

Senior Web Developer

- Developed new features for the in-house CMS.
- Integrated and customized an HTML5 video player to replace a Flash-based player on the company's multimedia platforms.
- Provided support and maintenance for internal tools.

Technologies: PHP (Zend Framework, Doctrine), JavaScript (jQuery, AngularJS), MySQL

Enlight Health / ListRunner [www.listrunnerapp.com]

December 2013 – April 2014

Lead Developer

- Developed a responsive Web application for doctors and nurses.
- Optimized for performance and user experience.

Technologies: JavaScript (AngularJS, Node.js, Grunt), Firebase, Heroku

Radio-Canada/CBC [www.radio-canada.ca]

August 2011 – September 2013

Web Developer; Team Lead (starting April 2012)

- Rewrote the company's primary back-end service, which feeds data to all its French-language news, TV and radio web sites and mobile applications.
- Extended and developed new WCF and RESTful Web APIs.
- Optimized web sites and user tools to reduce load times.
- Built new CMS's to replace 5 to 15-year-old systems.
- Worked on a HTML5/Backbone.js application for Smart TVs.

Technologies: C# (ASP.NET MVC & Web API, WCF, NHibernate), JavaScript (jQuery, Knockout, Backbone.js), SQL Server

Cactusoft [www.cactusoft.ca]

August 2009 – July 2011

Software Developer; co-owner (starting May 2010)

- Developed customized enterprise applications, including operations management and resource planning softwares.
- Clarified client requirements, business needs and project objectives, via feedback sessions and client meetings, in collaboration with all stakeholders.
- Produced technical specifications and business proposals.

Technologies: C# (ASP.NET MVC, WinForms, WCF, NHibernate), JavaScript, MySQL

Education

Polytechnique Montréal [www.polymtl.ca] – Montréal, Québec

2005 – 2010

B.Eng. in Computer Engineering.

Outstanding commendation award. GPA: 3.59/4

ENSTA ParisTech [www.ensta-paristech.fr] – Paris, France

2008 – 2009

Participated in an exchange program for a semester at one of the top Schools of Engineering in France.

HEC Montréal [www.hec.ca] – Montréal, Québec

2011 – 2012

Took evening classes in management.

Skills
